Dear Hiring Manager,

I am writing to express my keen interest in the QA Engineer position at your esteemed organization. With over 4 + years of experience in manual and API testing across web, mobile, and backend layers, I have contributed to high-impact projects in fintech, logistics, and e-commerce domains.

I bring hands-on expertise in test case design, UAT, defect tracking using JIRA, and validating APIs with Postman and DevTools. I have also collaborated in Agile environments, contributed to automation with Selenium and basic knowledge Playwright, and led knowledge transfer and recruitment activities. My goal is to ensure product quality, reliability, and user satisfaction through efficient and scalable QA practices.

I am eager to bring my experience and dedication to your team and would welcome the opportunity to discuss how I can contribute to your quality goals.

Thank you for your time and consideration.

Sincerely,

Sameer Rege
